🔐 SOC Internship – Day 13 Notes

🧪 Mini SOC Project (Final Assessment)

🎯 Objective

Act as a **SOC Analyst** to:

- Analyze security logs
- Identify potential attacks
- Prepare an **incident report**

📌 Scenario Summary

- Multiple **failed login attempts**
- Followed by a **successful login**
- Same **IP address**
- Target: **Admin account**

📊 Log Analysis

Apr 10 10:10:12 Failed login for admin from 185.45.23.11
Apr 10 10:10:18 Failed login for admin from 185.45.23.11
Apr 10 10:10:25 Failed login for admin from 185.45.23.11
Apr 10 10:11:05 Successful login for admin from 185.45.23.11

🔍 Key Findings

1️⃣ Suspicious IP

- **185.45.23.11**
- Reason: Multiple failed attempts followed by success

2️⃣ Attack Type

- **Brute Force Attack**
  👉 Repeated login attempts to guess password

3️⃣ Was the Attack Successful?

- ✅ **Yes**
- Because login was eventually successful

4️⃣ Severity Level

- 🔴 **High Severity**
- Reason:
  - Admin account compromised
  - Unauthorized access possible

5️⃣ Suggested Response

🚨 *Immediate Actions*

- Block the IP: 185.45.23.11
- Force **password reset** for admin
- Enable **Multi-Factor Authentication (MFA)**

🛡️ *Preventive Measures*

- Implement **account lockout policy**
- Monitor login attempts
- Use **SIEM alerts**

📝 Incident Report Format (Sample)

📄 Title

Unauthorized Admin Access via Brute Force Attack

Time

Apr 10, 10:10 AM – 10:11 AM

User

Admin

IP

185.45.23.11

Description

Multiple failed login attempts were detected from a single IP address, followed by a successful login into the admin account, indicating a brute force attack.

Severity

High

Actions Taken

- Blocked suspicious IP
- Reset admin password
- Enabled MFA

Status

Resolved / Under Monitoring
